

Investigating the Impact of Kansas City's Tenant Right to Counsel Program on Eviction Court Outcomes – Supplementary Materials

Table S1. Number of Units and Fixed Effects in Main Models.

Model	Unit of analysis	N	Number of zip codes in sample	Number of months	Existing fixed effects	Additional parameters if zip code fixed effects added
Model (1)	block group-month	26,483	39	71	month fixed effects	38
Model (2)	case-month	33,642	39	71	month fixed effects	38
Model (3)	case-month	33,478	39	71	month fixed effects	38
Model (4)	case-month	33,305	39	71	month fixed effects	38
Model (5)	case-month	33,471	39	71	month fixed effects	38

Notes: This table shows that adding zip code fixed effects would introduce an additional 38 binary variables in models, without contributing any identifying variation in treatment.

Notes: For zip codes 64030, 64157, and 66205, the treated share is 0% (i.e., no tenants in these zip codes were ever eligible for the Kansas City RTC program), which suggests that adding zip code fixed effects would not exploit any within–zip-code treatment variation.
